

VaxxinoVA International BV

VaxxinoVA develops, produces and markets a wide range of innovative vaccines to protect livestock and fish against disease. We create high quality solutions to improve animal health and to support the business of our customers. We believe that innovation and excellence in research are essential to produce premium products that match the current and future requirements in animal health.

VaxxinoVA is a young, international company. It is headquartered in Nijmegen, the Netherlands and has multiple sites across the world. We invest in research to achieve our ambitious goals and we are expanding our research and development department. We are looking for talented colleagues who enjoy working in an ambitious, dynamic and flexible research environment with opportunities for further professional development.

VaxxinoVA belongs to the Erich Wesjohann Group (EWG), a German based family-owned company specialized in poultry and fish genetics, nutrition and animal health. The EWG is highly committed to R&D and active in more than 50 countries. Due to the expansion of our Nijmegen Research site (located at the Novio Tech Campus) we are looking for:

RESEARCH TECHNICIAN Vaccine Research and Development (1 fte)

Responsibilities

- Participate in and contribute to innovative research and development projects to develop vaccines for veterinary use.
- Planning and execution of experiments in collaboration with the project leader and other (international) team members.
- Research projects may involve different areas of expertise, such as virology, immunology, cell culture, molecular biology or cell biology.
- Setting up, development and validation of new techniques and assays.
- Organize and report (animal) lab experiments.
- Work and report research data in accordance with internal and GLP (Good Laboratory Practice) guidelines.

Requirements

- Bachelor of (Applied) Science (BSc) degree or higher (or equivalent) in virology, immunology, biology or similar.
- Working experience in a research environment is an advantage.
- Experience in laboratory techniques associated with areas as virology, immunology, tissue culture, cell biology or molecular biology.
- Ability to think analytically, problem-solving skills, drive to succeed.
- Professional proficiency in English (written and spoken) is a requirement.
- Experience with and proactive approach to GLP requirements.
- Good communication and documentation skills.

Terms of employment

We offer exciting positions with the opportunity to work in a professional R&D surrounding. The primary and secondary benefits are excellent and include the possibility to follow subject-specific trainings.

Application

The selection process will be performed by Ajilon (www.Ajilon.nl). Requests for information and applications including a detailed cv can be directed to:
